SUMMARY

Results-oriented data analyst with a strong academic foundation and hands-on project experience in Python, SQL, Power BI, Tableau, and Excel. Skilled at transforming raw datasets into clear, actionable insights through data cleaning, exploratory analysis, and compelling visualizations. Eager to contribute to a data-driven team and deliver solutions that support strategic decision-making.

TECHNICAL SKILLS

Programming Languages: Python
Query Languages: SQL (SQL Server, MySQL, PostgreSQL)
Data Analysis: Pandas, NumPy, R, Excel (Advanced), Google Sheets
Data Visualization & BI: Power BI, Tableau, Matplotlib, Seaborn
Databases: SQL Server, MySQL, PostgreSQL, MongoDB
Machine Learning: Scikit-learn (KNN, content-based filtering)
Tools & Frameworks: Git, GitHub, Docker, FastAPI, Streamlit
Microsoft Office: Excel (Advanced), Word, PowerPoint, Teams
Languages: Arabic (Native), English (Fluent)

SOFT SKILLS

Communication & Presentation: Able to clearly convey complex data findings to both technical and non-technical audiences.
Problem-Solving: Analytical mindset with a structured approach to breaking down and solving data challenges.
Time Management: Ability to manage multiple tasks and meet deadlines efficiently under pressure.
Fast Learner: Quickly adapts to new tools, technologies, and methodologies.
Work Ethic: Committed, reliable, and consistently delivers high-quality work.
Leadership & Mentorship: Experience guiding peers and taking initiative on project direction.
Teamwork: Collaborative team player who thrives in cross-functional environments.
Positive Attitude: Brings energy and optimism to challenges, fostering a productive work environment.

PROJECTS

TikTok Shop Impulse-Buying Dashboard | Power BI | [View on GitHub](#)

- Designed an end-to-end Power BI dashboard analyzing consumer behavior data to surface the key drivers of impulse purchases on TikTok Shop.
- Applied DAX measures and custom visuals to present KPIs across demographics, product categories, and engagement metrics.
- Delivered actionable insights enabling marketing teams to prioritize high-conversion product segments.

HR Analytics Dashboard | Excel | [View on GitHub](#)

- Built a dynamic Excel dashboard tracking headcount, attrition rate, performance scores, and departmental KPIs using pivot tables and advanced charts.
- Automated data refresh workflows, reducing manual reporting effort and improving data accuracy.
- Produced executive-ready visuals enabling HR leadership to quickly identify retention risks.

Sales Analytics Dashboard | Power BI | [View on GitHub](#)

- Analyzed a multi-year sales dataset to identify top-performing products, customer segments, and regional trends.
- Created drill-through Power BI reports enabling stakeholders to explore revenue by category, region, and time period.
- Provided data-driven recommendations highlighting underperforming segments with growth potential.

Twitter Social Media Analytics Dashboard | Power BI | [View on GitHub](#)

- Developed a Power BI report consolidating social engagement metrics (impressions, reach, engagement rate) into a single interactive view.
- Identified content performance patterns and peak engagement windows to inform posting strategy.

Sales Dashboard | Tableau

- Cleaned and transformed a large-scale sales dataset using Python (Pandas), then built an interactive Tableau dashboard highlighting trends, outliers, and forecasts.
- Applied calculated fields and LOD expressions to surface insights beyond standard aggregations.

EDUCATION

Cairo University — Faculty of Computers and Artificial Intelligence	2020 – 2024
<i>B.Sc. in Operations Research and Decision Support</i>	
Graduation Project: Diet Recommendation System — AI-Powered Nutrition Planner Grade: A+ (Excellent)	
- Built a full-stack web application generating personalized diet plans using K-Nearest Neighbors (KNN) with cosine similarity for intelligent meal matching across a dataset of 270,000+ recipes. - Technologies: Python, Scikit-learn, FastAPI, Streamlit, Docker. Features: BMI calculation, calorie estimation, nutritional visualization, ingredient-based filtering.	

CERTIFICATIONS AND TRAINING

Google Data Analytics Professional Certificate Google / Coursera Certificate	2026
9-course program covering the full analytics workflow: data collection, cleaning, analysis, and visualization. Completed a real-world capstone case study. Tools: SQL, Python, Tableau, Excel.	
Digital Egypt Youth — Data Analysis Track Ministry of Communications, Egypt Certificate	Oct 2024 – Dec 2024
Intensive training covering SQL, Python, Excel, Tableau, Power BI, and R. Included a 30-hour freelance professional skills module (communication, presentation, problem-solving).	
SQL Fundamentals Track — 26 Hours DataCamp Verify	Nov 2024
Structured SQL track covering queries, joins, aggregations, CTEs, and window functions.	
HackerRank SQL (Basic) Certificate HackerRank Verify	2024
Earned HackerRank SQL Silver Badge.	
HackerRank Python (Basic) Certificate HackerRank Verify	2024
The Complete Python Bootcamp: Zero to Expert Udemy Verify	2024
Comprehensive Python programming course covering OOP, data structures, algorithms, and automation.	
Python for Data Science and Machine Learning Udemy Verify	2024
Applied course covering Scikit-learn, Pandas, NumPy, Matplotlib, and Seaborn for data analysis and ML workflows.	
Microsoft Office: Excel, Word, PowerPoint and Teams for Professionals Udemy Verify	2024
